NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization and Nature of Business

The Company was incorporated in Massachusetts in January, 1989 and is a broker-dealer registered with the Securities and Exchange Commission (SEC) and is a member of the Financial Industry Regulatory Authority, Inc. (FINRA).

Basis of Accounting

The Company's financial statements are prepared using the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Marketable Securities

Investments are valued at market, cost is determined on the specific identification method; realized and unrealized gains and losses for trading securities are reflected in revenue. Advertising costs are expensed as they are incurred. Advertising expense for the year ended December 31, 2017 was \$2,776.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in these financial statements and accompanying notes. In the event counterparties do not fulfill their obligations the Company may be exposed to risk. The risk of default depends on the credit worthiness of the counterparty or issuer of the instrument. It is the Company's policy to review, as necessary, the credit standing of each counterparty with which it conducts business.

The Company maintains cash balances at several banks. Accounts at each institution are insured by the Federal Deposit Insurance Corporation up to \$250,000. The balances at times may exceed federally insured limits. The Company believes there is no significant risk with respect to these deposits.

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2017

NOTE 9 – FAIR VALUE

FASB ASC 820 defines fair value, establishes a framework for measuring fair value, and establishes a fair value hierarchy which prioritizes the inputs to valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market. Valuation techniques that are consistent with the market income or cost approach, as specified by FASB ASC 820, are used to measure fair value.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities the Company has the ability to access.

Level 2 inputs are inputs (other than quoted prices included within level 1) that are observable for the asset or liability, either directly or indirectly.

Level 3 are unobservable inputs for the asset or liability and rely on management's own assumption about the assumptions that market participants would use in pricing the asset or liability. (The unobservable inputs should be developed based on the best information available in the circumstances and may include the Company's own data.)

A qualifying asset or liability's level within the framework is based upon the lowest level of any input that is significant to the fair value measurement. The Company's qualifying assets or liabilities are recorded at fair value using Level 1 inputs.

NOTE 10 – SUBSEQUENT EVENTS

Management has evaluated subsequent events through February 8, 2018, the date on which the financial statements were available to be issued. There were no subsequent events that require adjustment or disclosure in the financial statements.
